

Single clip-on T profile with TEKOFIX substructure

Type K with U wall holder

Type S on T profile

Type K on coffer

PRIMO panel with folded edges

PRIMO panel with substructure

PRIMO CLIP-ON WALL SYSTEM

THE NUMEROUS BENEFITS:

- ❖ The whole range of BEMO color, material and surface variety, also for our PRIMO clip-on wall system.
- ❖ Perforated models possible with perforation up to 62%.
- ❖ Can be laid in a random structure, off set or in a grid single or multiple colors.
- ❖ Variable grid sizes possible, also in combination with each other.
- ❖ Large grid size up to 800mm possible.
- ❖ Permanent and unlimited expansion capability.
- ❖ Easy and very fast assembly of the panels.
- ❖ Panels can be replaced easily and quickly.
- ❖ Special solutions doable for windows and corners.
- ❖ Substructure can be selected for each application.

On request, we will support you in all phases of your project, from the design of your wall system right up to implementation planning, including the TEKOFIX substructure.

PRIMO Clip-on Wall System
